

**District Domestic Product of  
Maharashtra  
2011-12 to 2020-21  
(Base Year 2011-12)**

**DIRECTORATE OF ECONOMICS & STATISTICS,  
PLANNING DEPARTMENT,  
GOVERNMENT OF MAHARASHTRA, MUMBAI.**

## **PREFACE**

State Domestic Product is an important economic indicator depicting growth and structural changes in the economy. District Domestic Product is one of the important indicators measuring economic growth of the District.

The Directorate compiles the estimates of GSDP, NSDP and Per Capita Income at current and constant prices as per the base year. From these estimates growth rates are deduced to understand the changes in different sectors of the Economy over the years.. The district domestic product broadly gives better understanding of the inter district/regional economic development.

This publication presents the District level estimates of Gross Domestic Product and Net Domestic Product for districts in Maharashtra for year 2011-12 to 2020-21 in new series with base year 2011-12.

This publication could be useful to the policy makers, administrators, planners and research scholars. Any suggestions, feedback or comments on this report are welcome to improve the publication in the future.

Vijay Aher  
Director

Directorate of Economics and Statistics  
Government of Maharashtra

Place : Mumbai

# 1. INTRODUCTION

1.1 District Domestic Product (DDP) is considered to be one of the most important indicators to measure the economic growth of a District and the estimates of per capita income of the District measures the standard of living of the inhabitants of the District. Preparation of DDP estimates has gained added importance, as it is one of the three indicators to construct a composite Human Development Index (HDI).

1.2 As per revised methodology for new base year, sector wise estimates are being presented as Gross Value Added (GVA) at basic prices while GDP is being referred to as GDP at market price. Accordingly, sector wise Gross District Value Added (GDVA) are presented at basic prices and GDDP is being referred as GDDP at market price. The estimates at current prices are referred as 'nominal' and estimates at constant prices are referred as 'real'.

1.3 When the capital, one of the primary factors used in production and which depreciates as a result of its use in the process of production, is deducted from GDVA, we get NDVA. The estimates of GDVA and NDVA are compiled for 17 broadly categorized sectors

Taxes and subsidies on products are taken into account to arrive at GDDP/ NDDP.

$$\text{GDDP} = \text{GDVA} + \text{Taxes on products} - \text{Subsidies on products}$$

$$\text{NDDP} = \text{NDVA} + \text{Taxes on products} - \text{Subsidies on products}$$

The Per Capita District Domestic Product is a measure of average income within District per person in a population. It is usually used to measure the standard of living of a District. It is calculated by dividing the total aggregate income from all the sources by the total mid-year population.

1.4 In this publication sector wise estimates of Gross District Value Added (GDVA), Net District Value Added (NDVA), Gross District Domestic Product (GDDP) and Net District Domestic Product (NDDP) have been presented for the years 2011-12 to 2020-21 (base year 2011-12) at current and constant prices.

\*\*\*\*\*

## 2. METHODOLOGY

2.1 The methodology for preparation of District income estimates very much depends on availability of basic data at district level. The availability of district wise basic data required for estimation of income at the district level is still not satisfactory. District-wise data is available only for primary and manufacturing sector. Therefore, the district level data could be utilised to the extent of its availability to compute the district income estimates adapting the State level methodology. In the case of non-commodity producing sectors, where the district wise basic data is not available, the state level estimates are allocated to the districts on the basis of suitable district-wise indicators.

Methodology of computation of sectoral estimates for district for each sector is given in the following paragraphs.

### **Agriculture and Allied Activities**

#### **Crop**

2.2 The agricultural crops are divided into 11 groups viz. Cereals, Pulses, Oilseeds, Sugar, Fibres, Drugs & Narcotics, Dyes & Tanning, Condiments & Spices, Fruits (fresh & dry) and Vegetables (including Floriculture & Horticulture) and By-products of these agricultural crops for valuation. Estimates of production of major crops along with minor crops viz. paddy, wheat, jowar, bajra, barley, maize, ragi, small millets [small millets include kodra, common millets (vari), sava and badali], gram, tur/arhar, urid, moong, masur, horse gram, wal, watana, lakh, linseed, sesamum, groundnut, rapeseed and mustard, castor seed, soyabean, sunflower, coconut, safflower, niger seed, dressed cane, other sugar, kapas, sunhemp, mesta, tobacco leaf, tobacco stems, dry chillies, dry ginger, turmeric, garlic, arecanut, tamarind, banana, grapes, sweet orange, cashew nut, mango, potato, sweet potato, onion, pomegranate, papaya, brinjal, guava, cabbage, cauliflower, etc. are worked out. The estimates of District Domestic Product in this sector are prepared by using production approach.

#### **Value of Output**

2.3 **Valuation of Crops:** The data on the wholesale prices are collected from all the regulated markets in the State through District Statistical Office (DSO). As far as possible, the prices are collected for the peak marketing periods of each crop and the valuation is done for the corresponding district. District-wise value of output is computed by using district-wise production and district prices, if available. However, if the corresponding price is not available then corresponding information of the adjacent district is used for calculation. Adjacent district means the district which is relatively similar to the district under consideration in terms of boundary in common, agro-climatic characteristics, geographical/socio-economic characteristics. In case adjacent district prices are also not available, the State average prices are considered. If the prices are not available, then the related Wholesale Price Index (WPI) is applied to previous year state average price and the same is used for districts. The list of peak marketing periods for different agricultural crops is given in Appendix - 1.1.

2.4 **Valuation of Sugarcane and gur:** As the districtwide gur production is not available, same is worked out as; 10.95% of the cane available for the purpose after deducting the (i) quantity of cane crushed, (ii) quantity of cane used for chewing (0.5% of cane production), (iii) quantity of

cane used for seed (3.0064 times the sugarcane area supplied by CoA, Pune) (iv) cane used in manufacturing sector/Khandsari (2.82% of total cane production, as per norm supplied by NSO) from the total sugarcane production. Production of the by-product, bagasse is also worked out for valuation (3.5 per cent of gur production as per norm supplied by NSO).

**2.5 Valuation of By-products:** The valuation of 22 by-products is done on the basis of per hectare value provided by National Statistics Office (NSO) every year. This per hectare value is applied to the area of respective crops. Ratios & norms used for the estimation of by-products are given in Appendix – 1.2.

**2.6 Valuation of Kapas (Cotton) :** Kapas represents seed cotton. Estimates of district wise production of Cotton lint (in bales of 170 kg each) are supplied by the CoA, Pune and prices under the Cotton Monopoly Procurement scheme of Government of Maharashtra are used (if the procurement is done), otherwise collected from DSO. Cotton lint is converted to kapas or seed cotton by using the conversion factor (100 kg kapas = 35 kg of cotton lint (65 kg is the weight of seeds)).

**2.7 Valuation of Grass:** Only naturally grown grass is considered under the grass category. The total grass means weight of green grass and dry grass. Area of grass is available from Land Utilization Statistics which is being provided by CoA, Pune. The yield rate of grass, i.e. 0.43757 tonne per hectare, as supplied by NSO, is applied to net area sown, area under miscellaneous tree crops, two times of area under culturable waste, four times of area under permanent pastures and two times of area under fallow lands to arrive at the total production of natural grass in the state. For valuation of grass, prices reported by DSO are used.

**2.8 Valuation of Fodder:** Fodder represents all the cultivated fodder crops. Estimation is done for two types of fodder viz. fodder available from irrigated land i.e. irrigated fodder and fodder available from un-irrigated land i.e. un-irrigated fodder. District wise area under these crops is taken from the Agricultural Census 2010-11 and the State level data is used from the Land Utilization Statistics as published by Directorate of Economics & Statistics, Ministry of Agriculture (DESMOA), GoI. The yield rate of fodder i.e. irrigated and un-irrigated has been taken as 50 tonnes per hectare for irrigated land and 25 tonnes per hectare for un-irrigated land as supplied by NSO.

**2.9 Valuation of Toddy:** The value of toddy (beverage) production is estimated by multiplying the value of toddy consumption in rural and urban area by respective rural and urban population. As toddy is one of the non-foods items, it is being calculated using monthly per capita quantity and value of consumption of non-food items (NSS 68th round result).

**2.10 Valuation of Kitchen Garden :** The estimate of value of output of kitchen garden (foreyard & backyard farming) is calculated by applying value per hectare of fruits & vegetables crops to 0.21 per cent of net sown area (norm provided by NSO) available from Land Utilization Statistics.

**2.11 Valuation of Floriculture:** Data on area, production of loose flowers in quintals and spikes in numbers along with respective prices are available annually to NSO from National Horticulture Board (NHB), GoI. Since such data is not made available regularly by Directorate of Horticulture, Pune; the value at current and constant prices made available by NSO is taken.

**2.12 Valuation of Unspecified crop groups:** The crops which do not have significant contribution in each of the groups are clubbed under ‘other...’ of each category. However, in case of Small Millets under Cereals category, area and production is available but prices are not available. For such crop groups, wherein only area figures are available and output figures are not available, their valuation is done either by weighted average price method or by applying appropriate average value per hectare to the corresponding area figures for each crop group separately using the ratios made available by NSO. The method and norms specified by NSO are summarized in the Appendix – 1.3.

### **Value of Inputs**

**2.13** Due to interdependencies of the Agriculture (proper) and Animal Husbandry sectors, the inputs could not be segregated till the previous series. From the 2011-12 series, the inputs are segregated separately. The deductible inputs are same as used at the State level viz. i) Seed, ii) Organic manure (Dung & Dung Droplets), iii) Chemical Fertilizers, iv) Feed of livestock (adult male cattle and adult male buffalo only) , v) Pesticides & Insecticides, vi) Diesel oil consumption, vii) Electricity, viii) Irrigation charges, ix) Market charges and x) Repairs and Maintenance.

**2.14** The value of these input items at the district level is calculated independently. However, if districtwise data for input calculation is not available then the State level estimates are allocated to various districts on the basis of certain proportions as indicated below:-

- **Seed:** The district-wise value of seed is calculated separately for Improved, Hybrid and Local seeds and then added together to arrive at total value of seed for the district. The seed rate per hectare provided by NSO for the state are applied to the district wise crop area to arrive at the total seed quantity. The year wise and crop wise seed rates as supplied by NSO are given in Appendix - 1.4. The State level consumption of Improved and Hybrid seeds is available from the CoA, Pune which is apportioned on the basis of district wise crop area. Local seed quantity is arrived by deducting the district wise improved and hybrid seed quantity from the total seed quantity. The State level prices for improved and hybrid seeds available from the Maharashtra State Seed Federation, Akola and for local seeds, wholesale prices of respective crops reported by DSO are used to calculate the district wise seed value. In some cases, where the seed rate (value per hectare) provided by NSO as mentioned in Appendix – 1.5, are applied on district wise area to arrive at the value of seed for the district. In the case of ‘other crop groups’ seed cost is worked out on the basis of norms (percentage of value of output) made available by NSO based on Cost of Cultivation Study (CCS), which are given in Appendix 1.6.
- **Organic Manure:** The district-wise estimates of value of output of dung manure worked out in Livestock sector are used which are based on the data of district wise output of dung provided by state agency along with the utilization rate provided by NSO.
- **Chemical Fertilizers:** District wise quantity of chemical fertilizers used and respective prices as made available by Fertilizers Association of India (Western Region) are used to work out district wise value.
- **Feed of livestock:** This input value is derived using the district wise projected population of animals (only Adult Cattle and Adult Buffalo) based on Livestock Census and Feed rates provided by NSO, GoI for the State.

- Pesticides and Insecticides: The State level value provided by NSO is allocated to the districts in proportion to the Gross District Domestic Product of respective district.
- Diesel Oil Consumption: Number of Tractors as provided by NSO for state and Projections of Diesel Oil Engines on the basis of Livestock Census data of 1997 and 2003 are used. Consumption rate is derived using the CCS result provided by NSO and the Wholesale Price Index as published by Office of Economic Advisor, GoI. The State level consumption rates and Wholesale Price Index (WPI) are applied to the district wise projected number of tractors/diesel engines based on Indian Livestock Census (ILC) 1997 & 2003 (apportioned with the total number of tractors for the state provided by NSO), to arrive at district wise valuations. The district wise data of registered tractors and trailers for Agriculture is available from the Transport Commissioner Office, Mumbai and is provided to NSO; however the same has not been incorporated by NSO.
- Electricity: District wise data of consumption of electricity for agriculture available from MSEDCL, Mumbai along with per unit rate is used.
- Irrigation Charges: The State level irrigation charges from State/local bodies budget documents are allocated in proportion to the area irrigated by Government canals/tanks for the respective district. The estimates at constant prices of the irrigation charges for 2011-12 are moved to subsequent years on the basis of the index of area irrigated by 'other sources' (A major part of which is net irrigated area by surface irrigation under Government canal and tanks).
- Market Charges: Rate of 3.22 percent as provided by NSO is applied on the GVO of Crop sector of the District to derive this input for the district.
- Repair and Maintenance: This input value is derived by applying the rate for the state on the National level GVO of Construction sector. Further the share of 0.79361 of crop sector is applied as provided by NSO to arrive at input value for Crop sector. State level input thus arrived at is allocated on the basis of district wise value of output of agriculture (crop) sector. Adding all these Inputs, one arrives at the Inputs of Crop sector for the district. Adding all these Inputs, one arrives at the Inputs of Crop sector for the district.

### **Gross Product from Operation of Government Irrigation System**

2.15 The State level total value of contribution by Government Irrigation system as obtained from derived sheets of Economic and Purpose classification of State/Local bodies budget documents, local bodies accounts, Consumption of Fixed Capital (Irrigation) and Gross Value Added (Non-Departmental Commercial Undertaking) as provided by NSO together constitutes the value of Income from Government Irrigation. This State level total is distributed among the districts in proportion to the district-wise area irrigated by Government Canals.

2.16 This is added to the district wise GVO of crop sector after deducting the value of inputs of the respective district to arrive at the GVA of that district.

**APPENDIX - 1.1****Peak marketing periods for different agricultural crops**

<b>Sr. No.</b>	<b>Crop</b>	<b>Months for which prices are collected</b>
1	Paddy	November, December, January
2	Wheat	March, April, May
3	Jowar	December, January, February, March, April, May
4	Bajra	December, January
5	Barley	April, May
6	Maize	November, December
7	Ragi	November, December
8	Italian Millets	October, November
9	Sava	November, December, January, February

**APPENDIX - 1.3****Norms in respect of crop groups for which valuation is based on area**

Sr. No.	Crops Group	Norm (value per hectare of area equal to)
1	Small millets	Weighted average of value per hectare of the crops, jowar, bajra, barley, maize and ragi
2	Other pulses	85 per cent of weighted average price of arhar, udid, moong, masur and horse gram
3	Other sugar	90 per cent of value per hectare of crop, sugarcane
4	Other oilseeds	85 per cent of weighted average of value per hectare of the crops, linseed, sesamum, castor seed, niger seed and safflower
5	Other fibres	90 per cent of weighted average of value per hectare of the crops, sunhemp and mesta
6	Other drugs & narcotics	90 per cent of weighted average of value per hectare of the crops, tobacco leaf and tobacco stem
7	Other condiments & spices	90 per cent of weighted average of value per hectare of the crops, dry chillies and dry ginger
8	Other fruits	Weighted average price of all fruits crops for which data of production / area available
9	Other vegetables	Weighted average price of all vegetables crops for which data of production / area available

**APPENDIX – 1.4****Year wise estimates of per hectare seed utilization to per hectare sown area (per tonne)**

Sr. No.	Name of Crops	Seed Rates
		2011-12 to 2020-21
1	Wheat	0.11294
2	Jowar	0.01088
3	Bajra	0.00441
4	Barley	0.13250
5	Maize	0.02210
6	Ragi	0.01880
7	Small Millets	0.01554
8	Gram	0.07016
9	Arhar (Tur)	0.01757
10	Urad (Udid)	0.01555
11	Moong	0.01627
12	Masoor	0.05163
13	Linseed	0.01500
14	Sesamum	0.00562
15	Groundnut	0.09067
16	Rapeseed & Mustard	0.00613
17	Castor	0.00502
18	Sugarcane	3.00640
19	Cotton	0.00188
20	Potato	2.40176

5	Other Veg. (Incl. Onion)	479.21	561.60	787.14	763.86	698.20	638.20	583.34	533.21	487.38	445.49
6	Other Condiments & Spices	2063.22	1819.75	2133.14	2492.37	2865.82	3295.22	3788.95	4356.67	5009.45	5760.04
7	Misc. Food Crops	446.68	490.90	553.54	538.25	606.60	683.62	770.41	868.24	978.48	1102.71
8	Misc. Non Food Crops	205.03	221.65	224.18	223.89	231.88	240.17	248.74	257.63	266.83	276.36

**APPENDIX – 1.6**  
**Norm for seed consumption (Value of yield per hectare)**

Sr. No.	Crops Group	Norm (value of yield per hectare of area equal to)
1	Other oilseeds	9.53 percent of Gross Value of Niger seed, Safflower, Sunflower, Soya bean & other oilseeds
2	Other pulses	3.95 percent of Gross Value of other pulses and horse gram
3	Sweet potato	12.1 percent of Gross Value of sweet potato

## **Livestock Sector (Animal Husbandry)**

2.17 The estimation of livestock sector comprises the value of various livestock and poultry products & the value of addition of livestock and poultry population. Various products like milk, meat & meat products, hides & skin, hair & wool, dung, eggs, value of useful items of fallen animals and increment in livestock is covered under this sector. The activities concerning production of honey, wax and silkworm cocoons are also covered in this sector. The estimates of DDP in this sector are prepared by adopting production approach.

### **Value of Output**

2.18 District-wise value of output is worked out by evaluating the production obtained and by the corresponding district prices, wherever available. In absence of district level prices, the State level prices are considered for evaluating the district production. The total of the value of output thus worked out is then adjusted to the State level estimates. In regard to items for which price data are not available, wholesale/retail prices of relevant items are used (e.g. for Skins of Goat and Sheep, wholesale price of goat skin is used, etc.)

2.19 The livestock products are divided into seven broad groups for estimation purpose viz. (i) milk, (ii) meat group, (iii) eggs & poultry meat, (iv) wool & hair, (v) dung, (vi) honey & wax, cocoons & silk worms and (vii) increment in livestock.

**Milk** : The annual milk production separately for cow, buffalo and goat supplied by Commissioner of Animal Husbandry (CAH), Maharashtra and prices reported by DSO are used to arrive at Milk valuation.

**Meat group** : Meat group consists of (a) meat (meat and edible offals & glands of bovines i.e. Cattle, Buffalo & ovines i.e. sheep, goat, pig), (b) meat product (fats, heads, legs, etc.) and by-products comprising of hides / skins (bovines & ovines) & specific category wise percentage of meat and meat product.

(a) **Meat** : The state level figure of meat production for bovines and ovines is provided by CAH and the prices are reported by DSO. Edible offals & glands include liver, spleen, heart, lungs, trachea, pancreas, mammary glands & esophagus. The percentage of value of meat used to arrive at the value of edible offals & glands (Cattle – 2.695, Buffalo – 1.305, Goat – 7.1781, Sheep – 6.7248, Pig – 3.6612) are supplied by NSO.

(b) **Meat Product & By-product** : The estimation of meat product is based on the number of slaughtered & fallen animals and corresponding state level yield rates, as provided by NSO. In the new series, the value of meat by-products (guts, blood, bones, horns, hooves, etc.) excluding hides & skins has been estimated as a percentage of value of meat & meat product. The meat product consists of heads and legs, fats from slaughtered and fallen animals. The percentage to value of meat used to arrive at the value of heads and legs (Cattle – 2.237, Buffalo – 2.3672, Goat – 5.3751, Sheep – 6.3281, Pig – 2.1089) and Fats from Slaughtered animals (Cattle – 2.07, Buffalo – 1.9249, Goat – 2.7276, Sheep – 2.9818, Pig – 2.5831) are supplied by NSO. The mortality rate (Cattle – 3.59, Buffalo – 6.98, Goat – 3.95, Sheep – 6.44) as provided by NSO is applied on projected population of respective category to arrive at number of fallen animals. The yield rate of 0.368 kg per animal for Cattle and Buffalo as supplied by NSO is used to arrive at the valuation of Fats from Fallen animals. Meat By-product consists of Hide & Skin and other by-products. The value of hide & skin from fallen animals is calculated using the number of fallen animals and prices

as reported by DSO. The value of hide & skin from Slaughtered animals is calculated using the percentage to value of meat (Cattle – 7.07297, Buffalo – 6.67422, Goat – 3.07149, Sheep – 3.32049) as provided by NSO. The value of meat by-product of different animals is derived using the percentage to value of meat (1.9306 for cattle, 2.2198 for buffalo, 3.225 for goat, 3.6981 for sheep and 1.0544 for pig), as provided by NSO.

**Eggs & poultry meat** : The data regarding hen eggs production during the year is provided by CAH. The estimation of poultry meat is done using the information of utilization of eggs and chickens survived.

**Wool & hair** : This group consists of wool, goat hair, camel hair and pig bristles. The estimates of wool production as provided by CAH are used in estimation. As regards the output of goat hair, pig bristles and camel hair the norms made available by NSO are used. (Goat Hair – 0.0352 gm per kg per animal per annum, Pig Bristles – 0.155 gm per kg per animal per annum & Camel Hair – 800 gm per kg per animal per annum).

**Dung** : Dung is used as manure as well as fuel. The data regarding utilization rates and average dung quantity [collected per bovine, per day] are provided by CAH annually.

**Silkworm cocoons, honey and wax** : The data on district wise production and value for Honey & Wax is provided by Khadi and Village Industries Board (KVIB), Mumbai whereas corresponding data for Tassar & Cocoon is being provided by Directorate of Sericulture, Nagpur. Also, state wise data for Honey & Wax is obtained from Khadi and Village Industries Commission (KVIC), Vile Parle or NHB, GoI.

**Increment in livestock** : Annual net increase in the population is estimated separately for each category of livestock viz. cattle, buffalo, sheep and goat, pig, duck and fowls on the basis of projected population.

### **Value of Inputs**

2.20 From the 2011-12 series, the inputs for Agriculture (proper) and Animal Husbandry sectors segregated separately. The deductible inputs are same as used at the State level viz. (i) Feed of Livestock (Other than Adult Male Cattle and Buffalo), ii) Market Charges and iii) Operational Cost.

2.21 The value of these input items at the district level is calculated independently. However, if district wise data for input calculation is not available then the State level estimates are allocated to various districts on the basis of certain proportions as indicated below:-

- **Feed of livestock:** (a) Quantity of roughages consumed by animals is worked out using the proportion (as provided by NSO) to agricultural by-products produced. In addition to this, the consumption of fodder (as percentages) by animals grazing in the forest area provided by NSO is considered as an input to the agriculture sector. (b) The base year value of concentrates fed per animal per year for different groups are used alongwith the WPI of foodgrains to derive the valuations at current prices. Data on the feed for livestock (concentrates) is based on the CCS data and is provided by NSO.
- **Market Charges:** State level Rate as provided by NSO is applied on the districtwise number of respective slaughtered animals obtained from Office of Commissioner of Animal Husbandry, GoM.

- **Repair and Maintenance of fixed assets and operational cost:** This input value is derived by applying the rate for the State on the National level GVO of Construction sector, further the share of livestock sector is applied and Operational cost is added by NSO and provided to DES. State level input, thus arrived at, is allocated on the basis of districtwise value of output of Livestock sector. The total of all these district level inputs is then subtracted from the districtwise GVO of the sector to arrive at district level GVA. The total of all these district level inputs is then subtracted from the districtwise GVO of the sector to arrive at district level GVA.

## **Forestry and Logging**

2.22 The economic activities covered under this sector include (i) forestry (planting and conservation of forests, gathering of uncultivated forest products, charcoal burning carried out in the forests) and (ii) logging (felling and rough cutting of trees, hewing or rough shaping of poles, blocks etc.) and transportation of the logs up to permanent lines of transport and (iii) farmyard wood (industrial wood and fuel wood collected by the primary producers from trees outside regular forest). The forest products are classified into two broad group viz., (a) Major forest products: comprising Industrial Wood (timber, round wood & match and pulp wood) and Fuel Wood (fire wood and charcoal wood) and (b) Non Timber forest products (NTFP) formerly known as minor forest products: comprising a large number of wild growing forest material such as tendu leaves, bamboo, sandal wood, charcoal, lac, fodder, gum, etc. The estimates of DDP in this sector are prepared by adopting production approach.

### **Value of output**

2.23 **Industrial Wood:** Industrial wood comprises of the valuation of Timber and poles. Quantity and value of Timber and poles are provided by Chief Conservator of Forests (CCF), Maharashtra State, Nagpur & Forest Development Corporation of Maharashtra (FDCM), Nagpur on the basis of which price is calculated. However, the information relates only to the authorized produce of Government forests. In order to account for the production of industrial wood outside the periphery of Government forest, private owned forest and non-traditional forest area named as 'Trees outside Forest (TOF)', a norm of 10 percent of recorded production provided by Forest Survey of India is adopted. Prices for the same are evaluated using industrial wood prices.

2.24 **Non Timber Forest Products (NTFP) :** NTFP includes bamboo, tendu leaves, grass & grazing, gum, hirda, moha and other. The value is made available by CCF, Nagpur. This value refers to the collection from the people / right holders staying in the perimeter of natural forests, who have access to the forests to exploit forest produce. In order to account for the district wise unrecorded production of NTFP, the proportion of 9 times of recorded output, as suggested by NSO is used. Also, since most of the livestock population solely depends on forest area for fodder / roughages, fodder has been included in the estimation as a part of NTFP. Proportion of 60.15% of cost of roughages as provided by NSO has been used to arrive at the value of fodder from forest sources.

2.25 **Fuel wood:** The quantity/output of fuel wood is estimated through consumption approach, as reliable estimates on production of fuel wood are not directly available. Firewood quantity is worked out by applying the consumption rate of firewood chips (from the results of NSS 68<sup>th</sup> round (2011-12)) to the projected population provided by Registrar General of India (RGI). For better coverage, the results provided by NSO are being used. For further year, it is worked out by using

growth observed in quantity of firewood consumption of NSS 61st round (2004-2005) and 68th round (2011-12). This district wise quantity of firewood is evaluated by using Wholesale Price Index (WPI) for fuel and light. This district wise estimate of firewood is then reduced by deducting the value of agriculture by-products viz. cotton stick, arhar stick, jute stick & bagasse, as these are consumed as fuel by the households and has already been taken into account in Crop Sector. These estimates are then inflated by 7.64 per cent (as per the Sources & Methodology given by NSO) to account for consumption of fuel wood by industries & religious purposes

### **Value of Input**

2.26 **Input** : The input is taken as combined value of gross value of Timber wood (Recorded & Un-recorded), firewood, fodder and NTFP (Recorded & Un-recorded).

**GVA** : The GVA is worked out by deducting aggregate inputs from GVO.

2.27 The estimates of gross value at constant (2011-12) prices are worked out by evaluating the output of timber and firewood of respective years at 2011-12 prices. In the case of NTFP, where only value is available, the value of output is obtained using the ratio of value of output of major forest produce at constant to current prices.

### **Fishing**

2.28 The activities integrated in this sector are commercial fishing, subsistence fishing, fish curing & gathering of sea weeds, sea shells, pearls, sponges and other ocean and coastal water products. Commercial fishing is carried out in (i) Ocean, coastal and off-shore waters and (ii) inland waters, which include catching, tackling and gathering of fish from rivers, irrigation and other canals, lakes, tanks, inundated tracts etc. whereas salting and sun drying of fish under fish curing is undertaken. The estimates of DDP are prepared using production approach.

### **Value of output:**

2.29 **GVO** : The value of marine fish (in fresh form, sun dried and salted) and inland fish (fresh form) added together gives the GVO of this sector. The valuation of marine fish is done considering the utilization in fresh form and in cured form. The inland fish is all consumed in fresh form and hence its value in fresh form is only considered. No reliable data on subsistence fishing is available and hence the same is taken as 12.5 per cent of inland fish production as indicated by NSO for earlier series. The net production from collection of pearls and chanks etc. has not been considered as this activity is on negligible scale and the relevant data is not available.

### **Value of Input:**

2.30 **Inputs** : Adequate annual data on inputs (except cost of salt used) and operational cost pertaining to the fisheries sector are not available. The input norms (per cent of GVO) provided by NSO are used for valuation of input viz. 22.5 percent for marine fish & prawns, one per cent for subsistence fish, one percent for fish salting, 10 percent for inland fish.

**GVA** : The GVA is worked out by deducting aggregate inputs from GVO.

2.31 The estimates of GVO at constant (2011-12) prices is prepared by evaluating the quantity of marine fish (in fresh form, sun dried and salted) and inland fish (fresh form) at 2011-12 prices.

2.32 The district wise production and value of marine and inland fish is made available by the state agency. The value of output for prawns is separately estimated. To work out the value of subsistence fish and inputs, the State level norm/ratios as provided by NSO are used for district income estimates.

## Industry Sector

Industry sector comprises of 'Mining', 'Manufacturing', 'Electricity, Gas, Water Supply & Other utility services' and 'Construction'.

### Mining & Quarrying

2.33 The economic activities covered under this sector comprises of extraction of minerals which occur in nature as solids, liquids or gases, underground & surface mines, quarries & oil wells with all supplementary operations for dressing & beneficiating ores and other crude minerals such as crushing, screening, washing, cleaning, grading, milling, floatation, melting, palletizing, topping and other preparations needed to render the material marketable. All these activities are covered to the extent they are carried on at the mine site. Salt production by solar evaporation of sea water is also included under mining sector. The estimates of GSDP from this sector are prepared by production approach.

### Value of Output -

2.34 **GVO** : Total value of output from Major and Minor minerals & Salt.

2.35 **Major Minerals** : The mineral wise Gross State Value Added (GSVA) at current prices is supplied by NSO. The ratio of mineral and district wise GVA calculated based on the data provided by Indian Bureau of Mines (IBM), Nagpur is used to apportion the GSVA to the districts. The ratio of constant to current prices of GVA is applied to the Gross District Value Added (GDVA) of respective mineral to arrive at the valuation at constant (2011-12) prices.

2.36 **Minor Minerals** : The mineral and district wise Gross Value of Output (GVO) at current prices is provided by Director of Geology & Mining (DGM), Maharashtra. The input rates provided by IBM, Nagpur for minor minerals is used to arrive at GVA. GSVA of Ordinary Sand is provided by NSO which is then apportioned to districts based on the calculated data of GVA of Sand provided by DGM..

2.37 State level GSVA of Petroleum as provided by NSO is apportioned to districts on the basis of the district wise number of employees provided by Oil and Natural Gas Corporation (ONGC), Mumbai.

2.38 To arrive at the constant value of Coal and Petroleum, the current value is deflated using Wholesale Price Index (WPI) of Coal and Crude Petroleum respectively.

2.39 The State level value added from industry and services sector is apportioned among districts in the proportion of district wise labour input based on Population Census 2011 (Main and Marginal workers excluding cultivators and agricultural labourers) for 'Manufacturing', 'Electricity, Gas, Water Supply & Other utility services' and 'Construction' sector.

2.40 Sectorwise value added is obtained as the proportion of GSVA of the given sector and GDVA (industry and services) of the particular district.

$$\text{GDVA of the 'i' sector for 'j' district} = \frac{\text{GDVA of industry and services sector of 'j' district} * \text{GSVA of 'i' sector}}{\text{GSVA of industry and services}}$$

Net District Value added and Sectorwise Net District Value added is obtained using above methodology where GDVA and GSVA is replaced by NDVA/ NSVA.

Taxes and subsidies on products are taken into account to arrive at GDDP/ NDDP. Districtwise taxes and subsidies are allocated in the proportion of districtwise value added.

## Services Sector

2.41 Services sector consists of activities where people offer their knowledge and time in the form of services thereby resulting in production of services. It comprises 'Railways', 'Transport', 'Storage', 'Trade, Repair, Hotels & Restaurants', 'Communication', 'Financial Services', 'Real Estate, Ownership of Dwelling & Professional Services', 'Public Administration & Defense' and 'Other Services'.

2.42 The State level value added from industry and services sector is apportioned among districts in the proportion of district wise labour input based on Population Census 2011. (Main and Marginal workers excluding cultivators and agricultural labourers).

2.43 Sectorwise value added is obtained as the proportion of GSVA of the given sector and GDVA (industry and services) of the particular district.

$$\text{GDVA of the 'i' sector for 'j' district} = \frac{\text{GDVA of industry and services sector of 'j' district} * \text{GSVA of 'i' sector}}{\text{GSVA of industry and services}}$$

Net District Value added and Sectorwise Net District Value added is obtained using above methodology where GDVA and GSVA is replaced by NDVA/ NSVA.

Taxes and subsidies on products are taken into account to arrive at GDDP/ NDDP. Districtwise taxes and subsidies are allocated in the proportion of districtwise value added.

\*\*\*\*\*

### 3. STATE INCOME ESTIMATES

3.1 As per first revised estimates for year 2020-21, gross state domestic product (GSDP) at current prices is estimated to be ₹ 27,22,509 crore lower by (-) 0.4 per cent than previous year. GSDP at constant prices is estimates to be ₹ 18,89,117 crore showing growth rate of (-) 7.6 per cent over the previous year. Sectorwise Gross State Value Added (GSVA), Net State Value Added (NSVA), GSDP and NSDP at current and constant prices for year 2011-12 to 2020-21 are given in Statement 1 to 4 of section II.

3.2 During 2020-21, real GSVA of 'Agriculture and allied activities' sector, 'Industry' sector and 'Services' sector is expected to grow by 17.9 per cent, (-) 10.0 per cent and (-) 9.0 per cent respectively. Average annual growth rate of real GSVA of 'Agriculture and allied activities' sector, 'Industry' sector and 'Services' sector from 2012-13 to 2020-21 is 4.1 per cent, 2.9 per cent and 5.6 per cent respectively. Annual growth rate of real GSDP i.e. GSDP at constant prices, sectorwise real GSVA and per capita GSDP is given in Table 3.1.

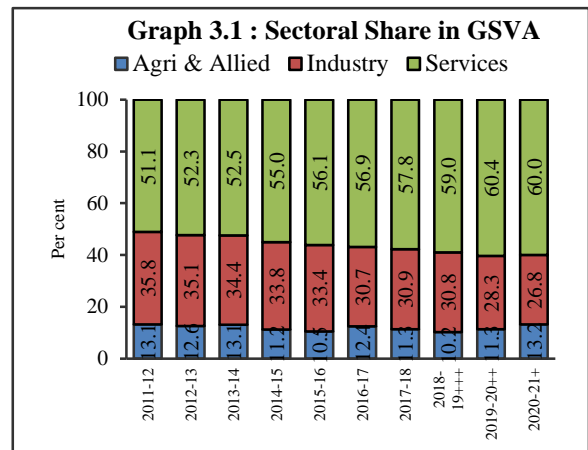

**Table 3.1 Annual growth rates of real GSDP, sectorwise real GSVA and per capita real GSDP**

Particulars	Growth rate									Average
	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19 <sup>+++</sup>	2019-20 <sup>++</sup>	2020-21 <sup>+</sup>	growth rate (2012-13 to 2020-21)

<sup>+++</sup> Third revised estimates    <sup>++</sup> Second revised estimates    <sup>+</sup> First revised estimates

Note : Sectorwise growth rates are based on GSVA whereas the growth rate of the State economy is based on GSDP

3.3 In nominal Gross State Value Added (GSVA) of the State, average share of ‘Services’ sector (56.1 per cent) is highest, followed by ‘Industry’ sector (32.0 per cent) and ‘Agriculture and allied activities’ sector (11.9 per cent). Share of Services sector shows trend from 2011-12. Sectoral share in GSVA of the State for year 2011-12 to 2020-21 is given in Graph 3.1.

\*\*\*\*\*

## 4. DISTRICT INCOME ESTIMATES

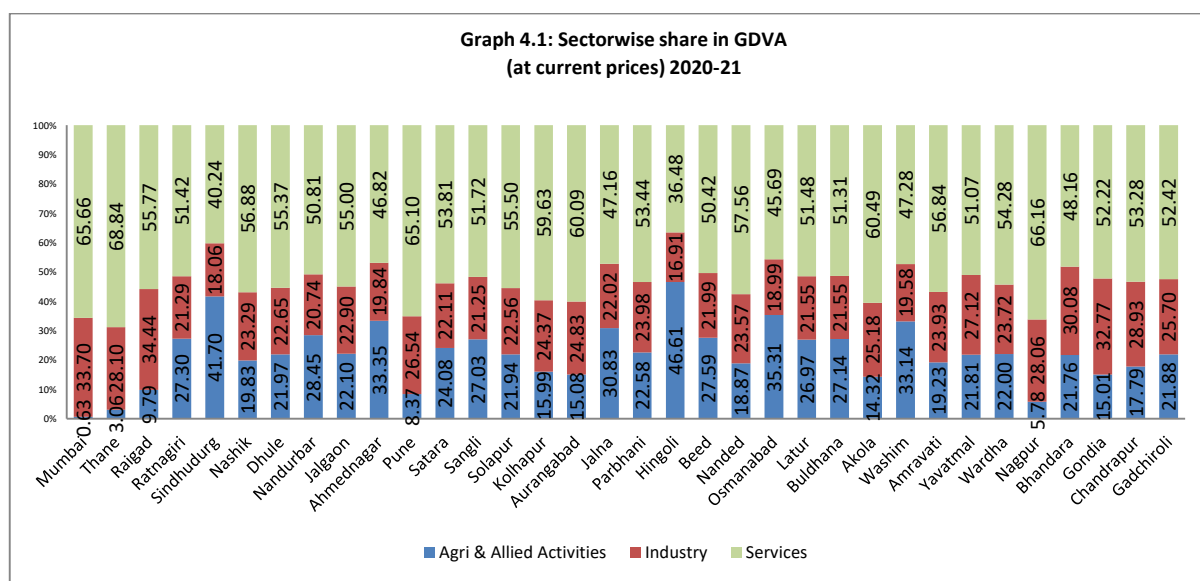

4.1 Revision in the base year (from 2004-05 to 2011-12) resulted in changes in the methodology and nomenclature. Estimates of Gross District Value Added (GDVA) are to be compiled using the 'Income Originating Approach' and therefore have inherent limitations. For the commodity producing sectors, district wise data is available but for other sectors, proxy indicators are used to allocate the GSVA estimates to districts. These district level estimates may be used only to have a broad idea of the economy at district level.

4.2 The District Domestic Product (DDP) is an important measure of performance of the economy of a district. DDP for 34 districts of Maharashtra is prepared and presented in this chapter. Due to non-availability of separate data for Mumbai city & Mumbai suburban and Thane & Palghar districts combined DDP for Mumbai and Thane district is prepared. Due to paucity of data, use of proxy indicators and various limitations in the estimation, the estimates of District Domestic Product (DDP) only provide broad judgment of income at district level. The DDP for the series 2011-12 has been calculated using the methodology explained in Chapter 2.

4.3 Average share of 'Agriculture and allied activities' sector is about 11.9 per cent in GSVA of the State. Pune district from Pune region and Nashik & Ahmednagar districts from Nashik region have maximum contribution in GSVA of this sector.

4.4 Average share of 'Industry' sector is about 32.0 per cent in GSVA of the State with maximum contribution from Konkan and Pune region of the State. Mumbai and Thane districts from Konkan region and Pune district from Pune region have maximum share in GSVA of this sector. Manufacturing is one of the important sector contributing about 20 per cent in GSVA of the State. Mumbai and Thane districts have maximum share of GSVA of manufacturing sector in the State.

4.5 'Services' is major sector of the economy with average contribution of 56.1 per cent to GSVA of the State. Konkan and Pune region have maximum share of this sector. Mumbai and Thane districts from Konkan region and Pune district from Pune region have maximum share in GSVA of this sector. 'Real estate and OD & Professional Services' and 'Financial services' are major contributors to GSVA of services sector. Sector wise share of GDVA for year 2020-21 is given in Graph 4.1.

4.6 Revenue division and Sector wise growth rate of GVA over previous year at constant prices for year 2011-12 to 2020-21 is given in Table 4.1 and Revenue division and Sector wise share of GVA in GSVA of the State is given in Table 4.2.

Some of the key findings of DDP estimates in new series are as below:

- GDVA of Mumbai (19.4 per cent), Thane (14.3 per cent) and Pune (11.4 per cent) districts have maximum share in GSVA of the State.
- Mumbai (Mumbai city and Mumbai Suburban taken together) has maximum per capita income (₹ 3,13,852) followed by Thane (including Palghar) (₹ 2,68,293) and Pune (₹ 2,56,936) district as per first revised estimates for the year 2020-21.
- Gadchiroli (₹ 94,214), Nandurbar (₹ 95,532) and Washim (₹ 96,520) have lowest per capita income as per first revised estimates for the year 2020-21.
- The average rate at which the Domestic product of Osmanabad and Gadchiroli has been lowest among all the districts viz. 3.7 and 2.8 respectively during 2011-12 to 2020-21.

4.7 Districtwise sectoral Gross District Value Added/ Net District Value Added and Gross District Domestic Product/ Net District Domestic Product for year 2011-12 to 2020-21 are given in Statement 5 to 44 of Section II.
